Abdul Jabbar Hafizh

Backend Engineer

Bogor, Jawa Barat, Indonesia • jabbarworld1@gmail.com • +62 821-1263-7227 • linkedin.com/in/abdul-jabbar-hafizh

PROFESSIONAL SUMMARY

Backend engineer with 5+ years of experience designing and operating distributed, high-performance server-side systems. Specializes in Go and TypeScript microservices communicating over gRPC and Protocol Buffers, backed by PostgreSQL, MongoDB, and Redis. Contributes to backend architecture and technical planning, breaking product requirements into deliverable work and raising engineering standards through contract-first API design, automated testing, and observability.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Node.js, Python, PHP, SQL

Backend Frameworks: Echo, NestJS, FastAPI, Flask, Laravel, Celery

API and Communication: gRPC and gRPC streaming, Protocol Buffers, REST, OpenAPI (contract-first with oapi-codegen), GraphQL, WebSockets

Databases and Data Access: PostgreSQL, MongoDB, Redis; sqlx, TypeORM, SQLAlchemy; query optimization, indexing, schema migrations (golang-migrate, Alembic)

Infrastructure: Docker, GitHub Actions, object storage (Azure Blob)

Testing and Automation: Cypress with Cucumber and Gherkin (BDD), API and end-to-end test automation, Jest, testify, gomock, table-driven unit testing, coverage gates

Observability and Code Quality: Datadog APM, Snyk, SonarQube, code review, conventional commits

Architecture and Practices: Microservices, Backend-for-Frontend (BFF), layered and clean architecture, OAuth2, JWT, SSO, RBAC, caching strategies, distributed locking, bounded worker pools, Agile/Scrum, trunk-based development

PROFESSIONAL EXPERIENCE

Backend Engineer — Bhumi Varta Technology — Nov 2022 - Present

Tangerang Selatan, Indonesia

- Contribute to backend architecture and technical planning for core product features, scoping product requirements into deliverable work.
- Re-platformed the core location-targeting service from NestJS to Go as one of its main contributors.
- Design contract-first APIs and gRPC services for communication across the backend platform.
- Built a dataset-matching pipeline with streaming ingestion, schema validation, and concurrent processing.
- Built OAuth2 authorization and SSO session management for an internal identity provider.
- Built and maintained backend services for geospatial analytics and location-targeting products used by enterprise clients, including REST APIs in NestJS and TypeScript covering authentication, user management, and core targeting features.
- Implemented region-scoped role-based access control so users retrieved only the data for their authorized regions.
- Added caching and distributed locking to protect concurrent write paths and reduce repeated query load.
- Developed Python services for a client market-analytics platform, covering API endpoints, data processing, and analytical computation.
- Own engineering quality: automated API and end-to-end test suites, 95% unit-test coverage gates in CI, static analysis, application performance monitoring, and dependency vulnerability remediation.
- Mentor backend engineers and uphold team conventions through code review across concurrent projects.

Back End Developer — ZettaByte Pte Ltd — Sep 2021 - Oct 2022

Singapore (Remote)

- Co-led a backend team, coordinating development workflow and sprint delivery.
- Built and maintained GraphQL APIs on Node.js and MongoDB.
- Authored a Backend Dev Checklist that standardized team process and shortened onboarding for new engineers.
- Ran code reviews, managed pull request merges, and owned deployments to staging.

- Diagnosed and resolved critical production incidents under time pressure.

ADDITIONAL EXPERIENCE

Web Developer (Freelance) — Universitas Islam Negeri Syarif Hidayatullah Jakarta Sep 2023 - Dec 2023

- Designed and shipped the official website for PLT Lab, the university Photovoltaic Technology Laboratory, using Node.js and MongoDB.

Web Developer (Freelance) — Universitas Islam Negeri Syarif Hidayatullah Jakarta Jul 2021 - Dec 2021

- Built and maintained Puskarier, the university Career Center job portal, enabling students and alumni to browse job listings, internships, and career resources (Laravel, PHP).
- Built and maintained the PUSLITPEN site for the university Research and Publication Center, supporting the management and publishing of academic research.

Web Developer, Internship — PT Lingkar Optima Indonesia (Loopinc) Jan 2020 - Mar 2020

Jakarta, Indonesia (Remote)

- Built the company landing page at loopinc.id and developed an internal online assessment system in Laravel.

EDUCATION

Bachelor of Informatics — Universitas Islam Negeri Syarif Hidayatullah Jakarta Jul 2018 - Feb 2023

- GPA: 3.71 / 4.00
- Led the Research and Development Department, Himpunan Mahasiswa Teknik Informatika (HMTI), Jan 2022 - Jul 2022.
- Led HimtiDev Web, an internal programming bootcamp on web development fundamentals for Informatics students, and served as second mentor teaching participants to build web systems with Laravel.
